

Zenitel integrates with Access It! by acre security

## Experience greater security, operational efficiency & high-quality audio with intelligent communication solutions from Zenitel

All security teams need to reduce risks and mitigate threats to ensure that a business can operate smoothly.

Intelligent communication makes that happen.

It begins with a powerful integration between Zenitel intercom solutions and the Access It! access control system.

- **Flexibility:** Integrations that can be customized and grow or expand over time.
- **Control:** Integrated audio, video, and alarm management create an interactive system that allows users to hear, see, and respond quickly to any situation.
- **Operational Efficiency:** Automated responses to routine security events allows operators to stay focused on critical threats.
- **Reduce Risk:** Use data from multiple systems to identify vulnerable areas and potentially troublesome behaviors and allocate resources more efficiently.

# Unleash the Power of Product Collaboration

## Intelligent Communications is driven by Intelligent Integrations

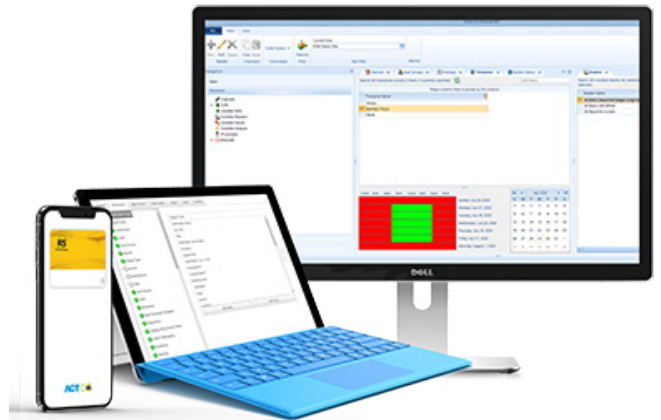

Audio becomes intelligent by seamlessly integrating into the core business and security processes within the organization. The combination of access control and audio creates multiple tools to keep people, property, and assets secure.

# Enhance your access control management

## Access It!

Acre security builds agile software solutions to help manage and automate your unique security needs. Solutions are custom fit for every industry with security and ease at the core. The Access It! platform has a powerful integration engine to amplify your security operations with best-in-class access security.

## Discover how audio enhances your access control management solution

How do you manage unknown visitors, guests and vendors? With the ability to hear, be heard, and be understood, in every situation.

Clear communication is critical to deciding who should have access to your facility and when. Intelligent communication between systems enhances the features of both, maximizing the value of the technology investment and increasing ROI.

Integrating audio with access control creates an intelligent and interactive system that allows for an informed response, by providing real-time situation awareness. Post event, it supports forensics and investigations to mitigate future security incidents.

## Zenitel Communication Platforms:

**IC-EDGE** This serverless communication system delivers seamless integration, unrivaled audio quality and ease of use, right out of the box.

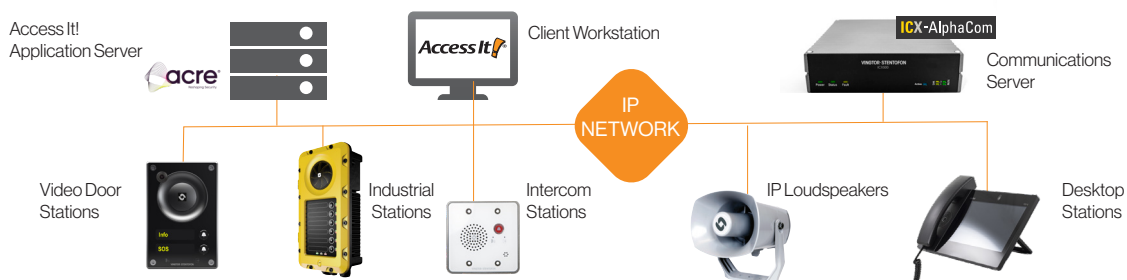

**ICX-AlphaCom** Our scalable, server-based platform enables advanced communication management, integrated with security applications.

\* Viewing video from an intercom station requires an DVR/NVR integration in Access It!

## Why Zenitel?

Zenitel is well positioned to drive the future of intelligent critical-communication solutions. Through our portfolio of IP products & solutions, with built-in intelligence and a focus on cybersecurity, we provide organizations with superior, scalable security and flexibility. Zenitel is the proven, preferred choice for environments requiring crystal-clear audio to ensure the protection of human life, property, assets and the management of critical activities. With interoperability at all levels, we seamlessly integrate with access control, video management and security platforms.
