

CORPORATE AND PUBLIC
SOLUTIONS

Keep your people and buildings
safe and secure with **Zenitel's**
Communication Solutions

Seamlessly Integrate
high-quality audio and video into the security mix

STREAMLINE OPERATIONS AND BE ON TOP OF SECURITY **WITH ZENITEL**

Zenitel's audio communication solutions add value to your video-based security system by helping you to act on what you hear and see.

Zenitel helps you communicate when it matters most.

Keep your Building Safe and Welcoming

From delivery bays to customer reception, high-quality entry point solutions from Zenitel offer a safe and welcoming experience, while providing security teams with intelligible interactive audio and video monitoring capabilities.

Enhance Situational Awareness

For all-area security, Zenitel's Public Address and Voice Alarm (PAVA) systems ensure building occupants remain informed and aware, day-to-day and in emergency situations, using powerful technology with smart analytics to deliver high-fidelity audio.

Enable Proactive Interaction

Two-way real-time crystal-clear communication in critical areas with integrated Talkback and Ambient Listening functionality allows security teams to act immediately on informed decisions, maximizing the safety for all building occupants.

Streamline Operations with Automated Workflow

Seamlessly connect with external security platforms, such as Video Management, Surveillance, Access Control and Building Management Systems, to automate processes with ease and enhance overall operational efficiency.

Unified communication solutions for building security, inside and out.

Zenitel's reliable security solutions are tailored to every area of today's modern or complex public and corporate buildings.

From door entry controls, automated safety reminders and perimeter surveillance, to elevators with customizable two-way audio and car park surveillance, you can safeguard your property with peace of mind.

Deliver sense of safety in elevators

Versatile two-way live audio and video interface for staff or visitors to communicate with security personnel in emergency situations.

Limit access and control movements

HD video intercoms help you with visual and aural identification and control movement through doors.

Communication in case of emergency

In the event of an emergency or when assistance is needed, Help Points guarantee seamless communication by integrating directly into existing information points or kiosks.

Keep everyone informed and safe throughout the building

Keep hallways, staircases, and other areas safe and clear in emergency situations with clear announcements using Zenitel's Public Address and Voice Alarm solutions.

Non-pervasive surveillance

IP Speakers provide ambient listening and talk-back features to keep an ear on building perimeter and act in real time and with clear communication.

Positive experiences at entry/exit barriers

Interactive audio and video intercom stations at the barriers gives a sense of safety and comfort to visitors and staff.

A welcoming experience at reception

High-quality and responsive audio solutions from Zenitel offer welcoming experience to the visitors.

Door entry intercoms for visitor management and control

Positive visual and auditory identification of visitor through HD video and audio door entry intercoms.

With the possibility of adding card readers from leading manufacturers such as HID and Elatec, you can now integrate audio, video, and access control into a single device. Streamline your visitor management and provide a positive experience for the visitors.

Communication for better safety & security

With out-of-the box integration to other security systems, manage and control all your security assets, including audio, audio from a single point.

Manage all your communication needs from a single terminal and dispatch live warning and pre-recorded messages, as well two-way communication centrally.

IP Speakers for immediate response

Empower your prison staff by adding interactivity through Talkback and Ambient Listening functions.

The inclusion of ONVIF support and SIP operation mode enables you to integrate our IP speakers into third-party video management systems, allowing you to act on what you see and hear.

Critical Communication Gateway for security

ICX-AlphaCom seamlessly integrates with market-leading surveillance, access control, and communication systems.

You will have advanced intercom functionality such as the ability to prerecord messages on your server for emergency communication and record intercom calls at any connected station.

PAVA Systems for peace of mind

For critical, event-driven announcements, pre-recorded messages, background music and audio files.

Zenitel's EN54-certified Public Address and Voice Alarm systems - such as the wall-mounted Integra - offer scalable, reliable and maintenance-free solutions to ensure operations run smoothly, keeping everyone informed and safe at all times during emergencies or evacuations.

Communication solutions for streamlining barrier entries

Embedded communication solutions for parking barriers and machines using Zenitel's Video enabled intercom kits.

Reduce vehicles traffic at the parking barrier by providing the ability to communicate swiftly in case of issues with tickets.

The wide range of Zenitel's IP kits comes with SIP and ONVIF compliant out-of-the box, making them extremely versatile to integrate with your existing parking installations.

Ensure a secure and welcoming experience through the dependability, clarity, and interoperability of Zenitel.

Peace of mind with **proven and trusted communication solutions**

With over 150 years of combined audio experience and thousands of successful deployments of communication solutions for building facilities, Zenitel has a proven track record of delivering on customer expectations and helping them with ensuring the safety, security and well-being of the staff, the visitors and facilities.
