DANS01

Wandmontierter Dynamischer Umgebungsgeräuschsensor

- DYNAMISCHER GERÄUSCHSENSOR
- ERWEITERTER TEMPERATURBEREICH
- DISKRETES IP65-GEHÄUSE
- SICHERER BETRIEB
- KOMPATIBEL MIT DEM VIPEDIA AUDIO ROUTER UND INTEGRA REIHEN

Public Address | Voice Alarm | Commercial Audio | Civil Defence Approval

Beschreibung

Der DANS01 Dynamic Ambient Noise Sensor wurde entwickelt, um mit der VIPEDIA-Reihe von DSP Audio Routern als Teil des Dynamic Ambient Noise Sensing Systems zu arbeiten.

Das Dynamic ANS System hält ständig die Lautstärke von öffentlichen Durchsagen knapp über dem Umgebungsgeräusch, um sicherzustellen, dass die Durchsagen immer verständlich und nicht übermäßig laut sind. Das DANS System verwendet digitale Signalverarbeitungstechnologie, um das Umgebungsgeräusch von der Durchsage zu unterscheiden. Dies ermöglicht Anpassungen des Übertragungslautstärkepegels, um Schwankungen im Umgebungsgeräusch widerzuspiegeln, sogar während die Durchsagen gemacht werden. Folglich werden die allgemeine Verständlichkeit und der Komfort von Durchsagen gegenüber traditionellen ANS-Systemen verbessert, und auch Probleme der öffentlichen Lärmminderung werden verbessert.
