# AlphaCom XE20

Audio Server for 19" Rack Mounting

---

 ICX-AlphaCom  HD Voice

---

## Description

- ✓ Made to provide critical communication in any environment
- ✓ Supports 552 IP stations and 102 analog intercom stations
- ✓ Global networking and integration
- ✓ IP, SIP and analog station support
- ✓ Extended Software Options
- ✓ SIM card based software configuration and disaster recovery
- ✓ Fully compatible with any AlphaCom system
- ✓ Extended memory supports future expansion and new services

- ✓ High quality professional PA broadcasting and messaging services
- ✓ Security voice guidance for public safety and building security
- ✓ Auto-attendant functionality (Automatic voice supported switchboard)
- ✓ Voice supported call guidance

Complete system with APWR-AC version Power Supply, 1 Processor Board, 1 Program&Clock Board, 2 Subscriber Line Boards, and 2 x 1.5m. flat ASLT connection cable with filter board.

With AlphaCom XE, flexibility is key. You can have just a few or thousands of users spread around different locations. Thanks to its open, modular design and scalable architecture, AlphaCom XE has the flexibility to grow with your business and adapt to your long term needs. The system can be tailored to support applications of almost unlimited specificity and complexity.

Vingtor-Stentofon's CCoIP® (Critical Communication over IP) implies the employment of Voice over IP applications required in critical situations. AlphaCom XE is designed with CCoIP incorporation which ensures the delivery of instant and secure voice and data services. The AlphaCom XE system provides carrier class system availability and protects resources in an IP environment by using embedded IP security mechanisms.

The main security mechanisms used are restricted management access, separate management interface, internal firewall and integrity check (MD5).

## CONNECTIONS

Up to 4 units may be mounted in one 19" rack if sufficient ventilation is provided. It is recommended to mount a 24 VDC cooling fan module on top of each exchange unit. The two-pair star wired intercom cables are connected to connection boards on the cabinet DIN rail or in a separate distribution field.

Each subscriber line card provides 6 freely programmable Remote Control Outputs (RCO). Two RJ-45 Ethernet terminals on the IP filter board are used for IP LAN and WAN communication. The serial ports with RS232 and RS422/RS485 interfaces are used for connecting to equipment using these protocols. Eth0 is also used for programming. 6 program distribution sources can be connected to the APC board via an optional program connection board. Up to 64 extra programs may be added using AGA boards with 16 programs per board. The optional program connection board has input for 6 Remote Control Inputs (RCI) which can initiate programmed actions.

The exchange is powered from the mains.
