## API License

OPC &amp; SDK

## Description

The API license is used by the OPC Server and the AlphaCom SDK (Software Development Kit). The OPC server and the SDK communicates with the AlphaCom over the TCP/IP protocol. For the server to operate, a license has to be supplied to the AlphaCom. In an AlphaNet each exchange must have its own API license.

### OPC Features

- ✓ Standards based on integration with OPC and Microsoft .Net
- ✓ True interoperability and scalability with OPC and Microsoft .Net
- ✓ Reduce implementation time and cost of system integration
- ✓ Easy and fast configuration, only limited configuration data is required

### SDK Features

- ✓ Easy integration between AlphaCom XE and system management software

- ✓ Based on Microsoft .NET
- ✓ Microsoft Visual Studio development environment
- ✓ Large base of library components
- ✓ Reduces implementation time and cost of system integration
