## Description

- ✓ The clock is equipped with an adjustable background light and has black hour and minute hands
- ✓ External dimming potentiometer is included in the package
- ✓ The hands are protected by a plain acrylic glass
- ✓ DCF format with time zone adjustment
- ✓ 2-wire bus connection with power and serial time code

The analog clock for wired DCF Time-Code from Marine Master Clock provides the possibility to create a time distribution system, with high accuracy and high reliability. The clock is intended for connection to a 2-wire bus which combines power supply and serial Time-Code. A built-in microprocessor receives the Time Code, reads the position of the hands, and sets the clock to the correct time. The Time-Code, built up according to the DCF-format, contains information about year, month, day hour and minute. At each minute shift, seconds are synchronised as well. The transmission speed is 1 bit/second. A 24VDC power supply for the built-in electronics is combined with the Time-Code. The clock is intended for time zone adjustment from a Marine master clock.

## GENERAL

|                    |  |
|--------------------|--|
| Mounting           | Console mounting                               |
| Housing            | Anodized aluminium                             |
| Colour             | Black frame, white face, black hands and marks |
| Dimensions (mm)    | 144W x 144H x 56D                              |
| Connection         | 2 wire   |
| Connection voltage | 24VDC combined with serial Time-Code           |
| Type of time code  | DCF-format with Time zone adjustment.          |
| Microcontroller    | PIC16F628                                      |
| Temperature range  | -20°C to +50°C                                 |
| Power consumption  | 15 mA  |
