Description

The Phontech Sound Reception Display Unit P-8300 MkII is designed to receive and detect foghorn sounds from other marine vessels in the range of 70-2100 Hz. The P-8300 MkII is for use on-board one-man operated closed bridge class ships.

Connected to an omnidirectional microphone/antenna unit mounted outside of the vessel, the P-8300 MkII main display unit will reproduce and amplify incoming sounds from all directions and indicate the approximate direction of the nearby ship by clear light indications.

By using high capacity microcontrollers and sophisticated software algorithms this digital system has superior performance, both for noise suppression and direction detection. Through the self-calibrating functionality, it is also is very easy to install.

The P-8300 MkII main display unit includes a web interface for easy configuration as well as a status (error) indication, control knob for adjustable volume, dimmer and LED test. The WEB interface configuration contains provisions for:

- Error description
- Network settings
- IEC 61162-450 settings
- Syslog settings
- Audio Settings
- Logging events
- Detection direction: Fore/aft (reverse)
- Master/Slave setting
- Direction alignment setting
- Detection Pointer hold time
- Firmware update
- Factory Reset
- Reeboot

This P-8300 MkII Sound Reception System is MED-approved and is wheel marked according to MED-B according to(EU) 2022/1157.
It is also UK-MER-D / UK-MER-B approved according to UK) MSN.1874.

The unit has DNV/ABS/RMRS/CCS type approvals.

The P-8300 MkII Sound Reception System is also designed to meet;
SOLAS Chapter V - Safety of navigation - Regulation 19*Carriage requirements for shipborne navigational systems and equipment.*
IMO Res. A.694(17) *General requirements for shipborne radio equipment forming part of the Global Maritime Distress and Safety System (GMDSS) and for electronic navigational aids.*
