ITCS-C4

Hospital Call Unit with Built-in Reset for Inelteh Call System

- ✓ Call unit for Inelteh Call System
- ✓ Push button activation on cable with built-in reset
- ✓ Visual call status indicator
- ✓ Bulkhead mounting
- ✓ Compatible with ITCS-A calling system

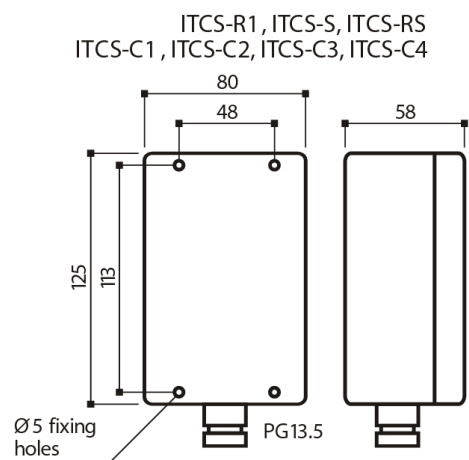

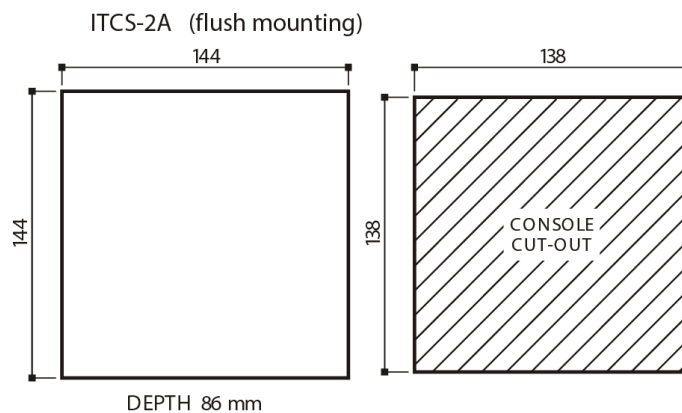

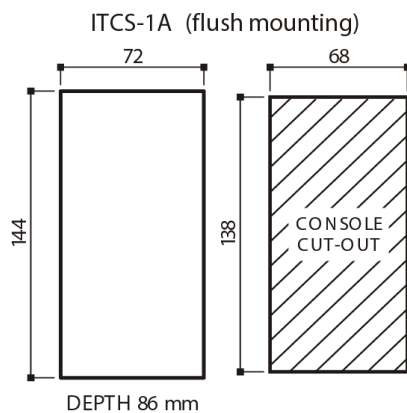

Description

The ITCS-C4 is a hospital call unit with an integrated reset function, designed for use in shipboard hospitals, patient care areas, and other medical facilities where an efficient call and reset system is required. where a dedicated call and reset mechanism is needed. It eliminates the requirement for a separate reset unit, streamlining onboard safety communication.

- ✓ Push-button call activation with built-in reset – Simplifies the call and reset process.
- ✓ Visual call status indicator – Provides clear and immediate feedback.
- ✓ Bulkhead mounting – Secure and space-efficient installation.
- ✓ Part of the ITCS-A calling system – Seamlessly integrates with Inelteh's emergency communication network.

The ITCS-C4 enhances onboard safety by providing a self-contained call and reset function, ensuring efficient emergency communication in critical areas.
