ILI-API64 / ILI-API512, API License (64 and 512 Stations)

API License

Description

The API license is used by the OPC Server and the VS-SDK for AlphaCom (Software Development Kit). Note that the VS-SDK for AlphaCom is also the SDK for ICX-Alphacom.

The OPC server and the SDK communicates with the ICX-AlphaCom over the TCP/IP protocol. For the server to operate, a license has to be supplied to the ICX-AlphaCom. In an AlphaNet each exchange must have its own API license.

OPC Features

- Standards based on integration with OPC and Microsoft .Net
- True interoperability and scalability with OPC and Microsoft .Net
- Reduce implementation time and cost of system integration
- Easy and fast configuration, only limited configuration data is required

SDK Features

- Easy integration between ICX-AlphaCom and system management software based on Microsoft .NET
- Microsoft Visual Studio development environment
- Large base of library components
- Reduces implementation time and cost of system integration

1002602306	ILI-API64	API License supporting 64 Stations
1002602309	ILI-API512	API License supporting 512 Stations
