ILF-M-BAS / ILF-M-ENH / ILF-M-EXT (Audio Messaging Licenses, Basic and Enhanced)

Audio Messaging Licenses

Description

- Support wide set of applications including auto-attendant, PA broadcasting, voice response and voice driven menus
- Safe and reliable storage of audio message in flash memory
- Easy to record messages from PC
- Easy to initiate audio messages from 3rd party systems using OPC, Vingtor-Stentofon SDK or Vingtor-Stentofon Data Protocol

Both the Basic and the Enhanced Audio Messaging Licenses have the capability of storing and playing audio messages from the Vingtor-Stentofon ICX-AlphaCom system. The messages are stored in safe and reliable flash memory on the main processor card.

The audio messaging license offers a wide set of applications and functions, some of which are:

- Live PA and group call broadcast with recall for handling feedback and verifying messages
- Prestored PA and group call broadcast
- Scheduled or event-based PA and group call broadcast
- Auto-attendant with voice guided menus for handling incoming calls
- Voice response for call request waiting messages and absence messages
- Integration with 3rd party systems via any of the ICX-AlphaCom protocols or interfaces

When the audio messaging license is activated, ICX-AlphaCom will have a set of default messages such as absence, alarm and general information messages. It is easy to modify the default messages as well as to add new messages. Both new and modified messages can be recorded from an intercom station.

Furthermore, it is possible to create messages on a PC and upload these to the system via ICX-Web. This means that you can use your favorite audio and music programs to create messages, which can then be uploaded to the ICX-AlphaCom.

The audio messaging license comes in three versions – Basic, Enhanced and Extended:

- No license:
  - Only ASVP help messages are available
