ATSC to IP Gateway 16X

ATSC to IP Gateway with 16 ATSC inputs

Description

The ATSC to IP Gateway is a universal solution for receiving, decoding, and multicast or unicast streaming of ATSC terrestrial TV channels. The key advantages of the ATSC to IP Gateway are its high density and compactness - the 1U rack-mount server can receive and decode 16 transponders. All 16 ATSC inputs are located at the rear panel of the appliance. It is used together with the IPTV Server 8000 v2.
