WM Touch BL

Wall mount touch panel for Mezzo series music amplifiers

- ✓ 4,3 inch LCD screen
- ✓ 16:9 Aspect ratio
- ✓ Wall mount
- ✓ Landscape or portrait orientation
- ✓ 300 nits brightness

Description

Control of sources, zones, and scenes is made easy and straightforward using a dedicated User interface. The WM Touch is a PoE fed wall-mounted touch screen that allows giving control of the entirety of the dynamic music distribution system from a single 4.3''screen panel. It is an elegant, effective, and intuitive control tool which uses standard ethernet to connect to the amplifiers and can be part of any normal network via RJ45 cable. Thanks to the PoE powering and the simplicity of installation in any single gang back box the WM Touch installation process is very straightforward and simple. It can be mounted both in vertical and horizontal orientation and is available in a black and white version.

The WM Touch is a wall-mounted touch screen solution aimed at remotely controlling audio system functionalities, such as zone level and source selection, system scenes recall, and system on/off.

The WM Touch is designed to fit single gang electrical boxes from all countries and can be mounted vertically or horizontally. Each box contains the necessary metal frame for wall mounting.

The WM Touch can be configured to adjust the level and/or pick the audio source for single and multiple zones. It can also be used for recalling different system configurations, and for turning the entire system on/off. Users have the freedom to choose what controls to display or hide, according to their installation needs.

The WM Touch is designed to match Mezzo's routing matrix capabilities and to flawlessly integrate in a Dynamic Music Distribution system, and can be conveniently configured through ArmoníaPlus.
