VSP-211M-L

Main Station - Batteryless Telephone System 20-Way

- 20 extension system
- 2 positions group selector switch
- 10 extension line selector switch
- Built-in system amplifier w/ capacitor battery
- Has terminals for auxiliary 24V DC when used as Common Battery Telephones.
- To avoid noise problems, the 24V DC must be supplied via a DC/DC converter
- LED call indication in front
- Flush mounted
- Wall mounting with corresponding metal cabinet type MBOKS-G
- Desk mounting with corresponding wooden cabinet type VSPC-OAK
- Suitable for installation in wheelhouse and control room

IP44

Description

VSP-211M-L Main Station: 20-Way Batteryless Telephone System

The VSP-211M-L Main Station offers a dependable solution as part of our established 20-Way Batteryless Telephone System. This system is designed to ensure seamless communication onboard vessels, even during power outages, making it a vital component of any ship's safety and communication equipment. Key features include:

- Flush-Mounting Design: For straightforward installation in various locations onboard.
- Selective Calling: Enhanced with a 10-position selector switch and a 2-position group selector for efficient communication between stations.
- Built-In System Amplifier: Uses a capacitor battery to maintain functionality without external power sources.

The VSP-211M-L is a proven choice for vessels requiring a robust and reliable secondary communication system in line with SOLAS standards.
