Description

The D150 is a class D transformerless amplifier card which can be configured to provide either 100V, 70V or 50V audio outputsThe maximum output power is user configurable from 25W to 150W.

Up to 10 D150 and or D500 amplifiers modules can be housed within a single V2000 or INTEGRA amplifier mainframeThe configurable output power capability of the amplifier modules enables very flexible use of the mainframe, with reduced mainframe count, lower quiescent power requirement, and improved environmental performance compared with traditional amplifier designs.
