- ✓ HARDWARE FALL BACK SUPPORTED
- ✓ COMPATIBLE WITH THE VIPEDIA RANGE

📢 Public Address   📢 Voice Alarm   Civil Defence Approval   **EN54** EN 54 Certified

Description

The EMS01 is an all-call emergency microphone station, supporting both live and pre-recorded message broadcast.

The microphone is housed in a lockable wall-mounting box and feature a graphic LCD display together with indicators for 'Power', 'Voice Alarm', 'System Fault', 'Fault' and 'Speak Now'. The LCD display provides remote access to the list of active faults in the PA/VA system, while the EN 54 mandated control keys enable navigation through the fault list, and also provide remote fault acceptance and clearance.

Multiple PA/VA system interfaces and can be connected directly to either one or two ASL audio routers, enabling multiple options for system redundancy. If configured, the microphone will operate in an All-Call hardware bypass fallback mode in the event of processor failure within the host Voice Alarm Router. There is also a non-EN54 RJ45 Ethernet IP interface with Power over Ethernet capability for VoIP connections to ASL IP based PA/VA systems. All interconnect cabling and the microphone capsule is continuously monitored for open and short circuits.

Accessories

EMX30

Expansion Module for
EMS20 with 30 buttons

VIPEDIA-BOA01

Din Rail Mount RJ45
