Description

The EAP01 Emergency Announcement Point is housed in an IP65 vandal resistant, lockable wall mounted enclosure. It is normally used for making All-Call emergency announcements to entire facilities.

The unit features indicators for 'Busy', 'Speak Now', and 'System Fault', together with a 'Status' indicator. The EAP01 will operate in an All-Call mode even in the event of processor failure within the Router1, as required by BS5839 Pt.8. The unit should be connected to Router's inputs 1 or 2, which operate in the All-Call failsafe override mode in the event of processor failure.
