RMR02

Radio Microphone Receiver module for the SAP02

- REMOTE MICROPHONE RECEIVER FOR THE RPA01
- HIGH QUALITY FULLY SYNTHESISED DIVERSITY RECEIVER
- INSTALL INSIDE THE SAP02 MICROPHONE
- LOCALISED ANTENNA POINTS
- COMPATIBLE WITH THE VIPEDIA AND INTEGRA RANGES

Public Address Commercial Audio

Description

The RMR02 Radio Microphone Receivers are self-contained high quality, fully synthesised diversity receivers, designed to fit within the ASL SAP Station Announcement Points.

The Receivers enable remote (Radio Microphone) announcements to be made in addition to the SAP's standard local (Fist Microphone) announcements.
The Receivers are capable of working on ten frequencies that are selectable via a rotary switch. They fit to the SAP front panel and connect directly to the SAP PCB. They feature a LED RF signal strength meter, which is visible through the SAP front panel. Additional circuitry for pilot tone detection prevents announcements from unauthorised transmitters. The pilot tone frequency is unique to this receiver. Thus only announcements from transmitters able to provide the same pilot tone, such as the ASL RPA01 Transmitter, are broadcast to the system, while announcements from unauthorised transmitters are blocked.
