iVENCS Public Address Module

Key Features

- FLEXIBLE CONTROL AND MONITORING OPTIONS
- SUPPORT MULTIPLE LANGUAGES
- PRE-RECORDED MESSAGE PLAYBACK
- LIVE BROADCAST
- 3D OR 2D GUI
- LISTEN IN
- SCHEDULED BROADCASTS
- BACKGROUND MUSIC CONTROL
- COMPATIBLE WITH IVENCS CORE

Public Address

Description

The iVENCS Public Address module provides a comprehensive set of PA functions, enabling single site, multiple site, and railway station, Long Line LLPA Public Address systems, and on train PA to be monitored and controlled.

System operators can select any PA zones on the 3D GUI to make live microphone broadcasts, stored message broadcasts, or Text-to-Speech broadcasts, and can also control the broadcast of background music or listen to the announcements that are being made in a PA zone.

The system can provide automated time scheduled broadcasts, and can be linked into railway train control and signalling systems or into airport flight operational database systems to provide automated passenger service
