Description

The SLR5500 Digital Telephone Patch-License Key is required to activate the Digital Telephone Patch feature.

The SLR5500 Digital Telephone Patch-License Key enables MOTOTRBO digital system users to place and receive telephone calls which are routed via a gateway between a landline telephone network and MOTOTRBO radio system.

Each phone gateway repeater in the system needs to have the Digital Telephone Patch feature activated using the CPS and this requires the purchase of a separate license key for each phone gateway repeater.
