Description

ATEX certified DECT Phone:

The telephone tool dedicated to sensitive environments

Developed by Ascom, the D83 Messenger ATEX is an ultra-robust DECT cordless telephone, dedicated to professionals working in sensitive environments. Easy to transport, this product has undergone a whole battery of tests in order to be certified according to the most demanding standards of robustness.

Ascom D83 Messenger ATEX

Intended for potentially dangerous environments , this D83 Messenger model is certified according to the ATEX standard , certification defining the degree of risk of each workplace according to the nature of the fuel and the working conditions , to guarantee users safe use of their product, regardless of the place of exercise.

Encompassing a powerful 950mAh Li-Ion battery rechargeable using the Versatile Connector , this phone offers up to 120 hours of standby time , users being able to communicate for more than 10 consecutive hours , while enjoying a relatively fast recharge of their device, the latter needing only 4 hours to be charged to 100%. The precise location system available thanks to DECT , Ascom IR , Low Frequency and Bluetooth Low Energy technologies allows users to know, in real time, the exact position of the phones in the range.
