## Description

The MPS50-G is part of the Microphone Paging Station (MPS) range of flexible paging and emergency microphones designed to work seamlessly with Zenitel PAVA audio routers. This microphone can be configured for live or store-and-forward broadcasts and to trigger zonal functions such as pre-recorded messages and background music (BGM) or control volume levels. Zone selection is facilitated through a rotary selector using the LCD display or the 50 physical buttons.

The MPS consists of a sloping console with a flexible gooseneck microphone, a graphic LCD display, a silent operation 'Touch to Talk' touchpad PTT button and a 50 button expansion panel.

Additionally, a VU bar-graph displays the optimum microphone input level and this along with the built-in AGC ensures that consistency in live broadcast levels are maintained. The MPS microphone range offers versatile mounting options, allowing use as a freestanding unit on a desk or permanent installation with an optional bracket.

If required, the MPS can be purchased with a fist microphone as an alternative for the standard gooseneck MPS50-F.

## Accessories

### VIPEDIA-BOA01

Din Rail Mount RJ45 Breakout Adapter - Single Port

Item Number: 1200550010

### VIPEDIA-BOA02

Din Rail Mount RJ45 Breakout Adapter - Four Port

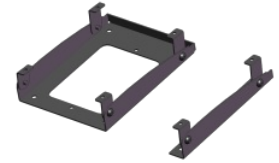

Item Number: 1200550020

### MPX10

Expansion Module for MPS01 with 10 buttons

Item Number: TBD
