ILP02

PAVA Passive Induction Loop for T-Coil Hearing Aids

- WIDE AREA COUNTER STYLE DEVICE
- EASILY INTEAGTED INTO THE ZENITEL PAVA SYSTEM
- WALL OR CEILING MOUNT
- PASSIVE AND DRIVEN DIRECTLY OFF THE 100 V SPEAKERLINE
- COMPATIBLE WITH THE V2000 AMPLIFIER RANGE
- COMPATIBLE WITH THE VIPEDIA AND INTEGRA AUDIO ROUTER RANGE
- MEETS BS EN60118-4
- COMPLIES WITH DISABILITY DISCRIMINATION ACT REQAUIREMENTS FOR THE HARD OF HEARING

Public Address Voice Alarm Commercial Audio

Description

Zenitel's ILP02 Induction Loop Panel provides clear, easily-heard announcements for individuals with hearing impairments through the Telecoil (T-coil) in hearing aids and cochlear implants. The unit generates an unmodulated AFIL (Audio Frequency Induction Loop) magnetic field to deliver the signal.

Designed as a wide-area, counter-style device, the ILP02 differs from custom room coils. It is specifically built for seamless integration into ASL PA/VA installations and is compatible with constant-voltage amplifiers. The unit is typically installed in areas requiring localized induction loop coverage, such as waiting areas. In railway stations, this might include ticket halls, platforms, passageways, and concourses.

The ILP02 helps service providers meet accessibility requirements, including the UK's Disability Discrimination Act, ensuring hearing-impaired individuals are accommodated while maintaining the site's aesthetic integrity.

The ILP02 is suitable for installation either mounted to a wall or suspended from the ceiling above a journey planner board or other information point. When wall-mounted, it is suitable for installation at 2.25 metres nominal height whereas when ceiling mounted it is suitable for installation at 2.5 metres nominal height.
