- ✓ Standardised OPC UA integration with third-party systems
- ✓ Secure client/server communication with encryption and user authentication
- ✓ Real-time access to status, alarms, and control points
- ✓ Configurable address space reflecting Zenitel Connect Pro objects and signals

ZCP Zenitel ConnectPRO

Description

Zenitel Connect Pro OPC UA provides secure, standardised integration with SCADA, BMS, and other automation platforms using the OPC UA standard. The solution enables real-time monitoring and control through access to status, alarms, and control points, with a configurable address space reflecting Zenitel Connect Pro objects and signals. Requires Zenitel Connect Pro 1.8.0 or later, ZCL-API license, and a Windows-based host.

For additional information, please see [Zenitel Wiki](#).
