Zenitel Product Portfolio Fully NDAA-Compliant

To whom it may concern,

Zenitel confirms that the product portfolio produced and sold by Zenitel Safety and Security, is fully NDAA-compliant.

Furthermore, Zenitel does not employ any SoC (System on Chip), or other components capable of processing software, from the banned Chinese companies. All Zenitel products use NDAAcompliant chipsets; most products use chips from NXP and/or Texas Instruments.

NDAA Summary

The John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year 2019 was signed into law on August 13, 2018. The law, specifically Section 889, prohibits federal agencies, their contractors and grant or loan recipients from procuring or using “telecommunications and video surveillance equipment or services” from specific Chinese companies as a “substantial or essential component of any system, or as critical technology as part of any system.” The NDAA ban includes telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation, as well as video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company.

Sincerely,

Thomas Hægh
Chief Technology Officer
