Upgrade from 1.6.0 to 1.7.0

Depending on the platform you are upgrading there are some differences.

Upgrade of the ICX-510:

- Select the file Zenitel_Connect_ICX510_1.7.0.swu and follow [Software Update \(Zenitel Connect Pro\) - Zenitel Wiki](#)

Upgrade of a VM, either VMWare or VirtualBox:

- Zenitel Connect Pro 1.7.0 runs under Ubuntu 24.04
 - Take a backup of the current configuration and store it safely
 - Install a new ova-file for the system (VMWare or VirtualBox)
 - Once the system is up and running again, restore the configuration from the backup file
 - Restore the license activation file if applicable https://wiki.zenitel.com/wiki/Upgrade_ZCP_virtual_machine_to_1.7.x

Device software compatibility

Zenitel Connect Pro is compatible with device software VS-IS 9.3.3.0 and higher. Software upgrade of Zenitel Connect Pro and device software can be done in any order, but full operational compatibility will only be achieved once all devices have been upgraded, as well as Zenitel Connect Pro.

Availability / Download

ZCP 1.7.0 is now available on Zenitel Wiki: <https://wiki.zenitel.com>. Click on the icons '**Release notes**' and '**Downloads**' for all relevant information and software images related to this release.

As software updates may be made available at any moment, it is always advisable to check for the latest available version on a regular basis. To be able to download software it is required to log in with a username and password. These can be obtained by sending an e-mail to alphasupport@zenitel.com. Please make sure that we can identify from the mail who you are.

Your Feedback

If you have any questions related to this bulletin, please contact your local Zenitel sales representative. We look forward to further developing our cooperation and are grateful for your continued business and support.
