

Legacy meets innovation

Zenitel supports the capital's transport and other historic landmarks with reliable, intelligible, and secure communication.

Across buildings, factories, terminals, and tunnels, our systems help operators keep Londoners and visitors informed, safe, and moving, no matter how complex the environment.

Public Address and Voice Alarm

Used for both daily operations and alarms, our EN54-16 certified PAVA system ensures clear communication in even the most acoustically demanding environments.

Intercom

Zenitel intercoms combine exceptional audio quality with highly customizable designs, adapting seamlessly to diverse customer needs and environments.

iVENCs Control System

An open and intuitive integrated management platform that provides control, monitoring, and incident analysis across all safety, security, and communication subsystems.

London Chooses Zenitel

Supreme Audio Quality

We deliver sound and intelligibility. From active noise cancellation to full-duplex communication, our systems are built to ensure your message is heard clearly, everytime, everywhere.

Cybersecurity, Built In

From device-level hardening to encrypted communications, we meet the highest industry standards.

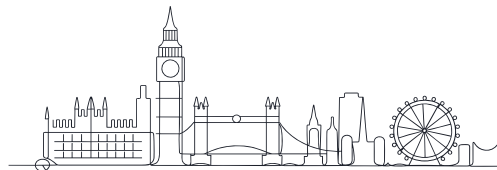

Seamless Integration

Zenitel works with a wide range of technology partners and protocols, making our systems easy to integrate into any existing infrastructure.

Proven and trusted

With 125+ years of experience and thousands of successful transportation deployments, Zenitel is a trusted expert in delivering reliable solutions that enhance safety and security for passengers, staff, and infrastructure.
