

PUBLIC ADDRESS
AND VOICE ALARM
SOLUTIONS

TRUSTED VOICE. UNCOMPROMISING CLARITY.

Your trusted communication partner,
helping keep people secure, informed, and connected.

Unified critical Communication

for safety, security,
and operations

With more than **125 years of experience** in critical communication solutions, Zenitel is a trusted communication partner, helping keep people secure, informed, and connected.

Zenitel's Unified Critical Communication (UCC) approach brings together intercom, Public Address, Voice Alarm, and IP Speakers into one cohesive communication ecosystem, helping organizations move from siloed systems to a coordinated operational response.

Truly a unique player in the market

When it comes to Public Address and Voice Alarm solutions, Zenitel delivers trusted reliability and exceptional audio quality. What sets us apart is our ability to unify a diverse portfolio of communication solutions under a single platform — **Zenitel Connect Pro**.

This makes it easier for system integrators and installers to deploy, integrate, and maintain our products. With multiple integration possibilities towards other security and safety systems, Zenitel's PAVA solutions are well suited for both new installations and upgrade projects.

M

We Enhance Clarity Where It Matters Most

Our PAVA solutions are designed to deliver exceptional audio performance for all types of announcements and background music. Powered by patented* amplifier technology, our PAVA product lines feature professional quality DSP, full-range frequency processing, and uncompressed native audio, which provides consistent and clear audio, every time, everywhere.

With user-friendly configuration tools and advanced signal processing capabilities, our PAVA range offers audio customization features such as Automatic Volume Control, Dynamic Range Compression, Time Alignment, and EQ adjustments. These features ensure optimal sound quality tailored to suit specific environments.

Acoustic echo cancellation

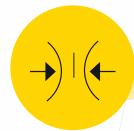

Automatic Gain Control

Active Noise Cancellation

Automatic Volume Control

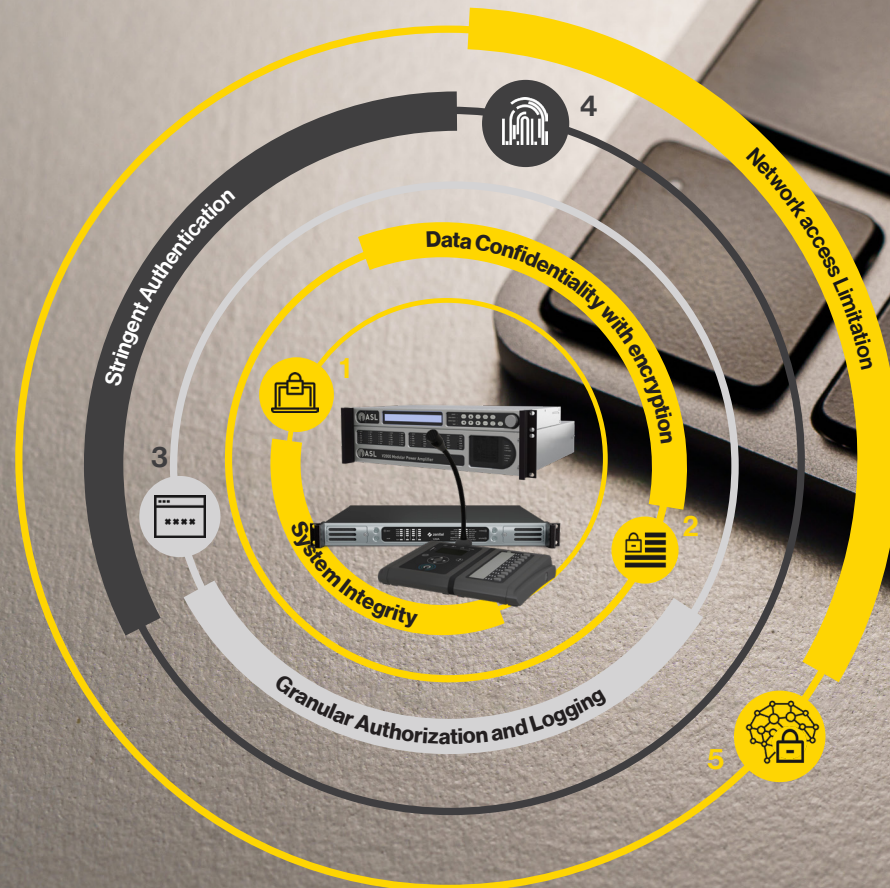

Dynamic Range Compression

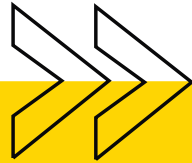

As PAVA systems become more integrated and remotely accessible, they also become potential entry points for cyberattacks. That's why cybersecurity isn't an afterthought at Zenitel, it's embedded into the core of our solutions.

Our PAVA systems are designed with a "defence-in-depth" approach*, meaning multiple layers of security are implemented to reduce risk, prevent breaches, and ensure system continuity.

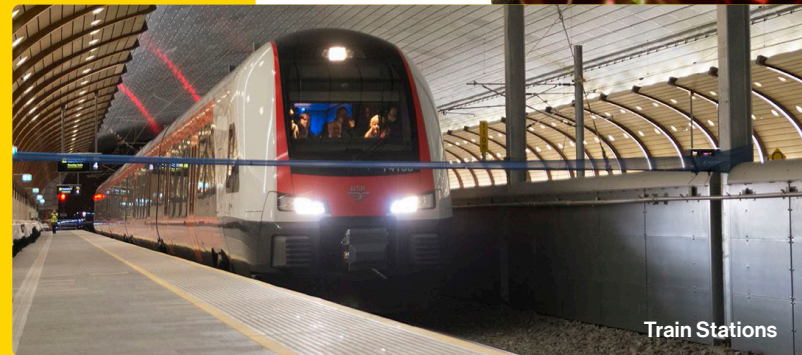

Designed for Cybersecurity.
Built for Resilience.

VIPEDIA

Stadiums

- **Scalable by design**
Supports up to 32 Vipedia routers over IP networks, enabling seamless expansion from single sites to large, multi-site deployments
- **Engineered for superior audio performance**
Advanced DSP ensures clear, intelligible announcements and high-quality background audio across all environments.
- **Cybersecurity built-in**
IEC 62443-4-2 compliant, delivering robust protection for critical communication systems.
- **Designed for continuous operation**
No single point of failure, with built-in redundancy to ensure system availability when it matters most.
- **Flexible architecture**
Adapts to evolving operational needs, supporting long-term scalability and system longevity.

INTEGRA

- Self-contained Wall Mount Voice Alarm
- Easy installation & Setup
- Integrated IP Audio Networking
- Pre-installed with 3, 5, 7 or 10 amplifier cards
- Up to 2000W total load
- DC/Impedance loop loudspeaker monitoring

Zenitel VAIA

- Patented amplifier technology delivering ultra-high density amplification
- Built-in backup amplifier
- Up to 1000W continuous power output across 4 Class-D amplifier channels
- Intelligent Flexi power distribution for power load distribution

About Zenitel

Zenitel is well positioned to drive the future of intelligent critical-communication solutions. Through our portfolio of IP products & solutions, with built-in intelligence and a focus on cybersecurity, we provide organisations with superior, scalable security and flexibility. Zenitel is the proven, preferred choice for environments requiring crystal-clear audio to ensure the protection of human life, property, assets and the management of critical activities. With interoperability at all levels, we seamlessly integrate with access control, video management and security platforms.
