

Release Bulletin

Introducing the Zenitel IP Speaker Kits: ZIPS-K and ZIPS-KOE

To : All Zenitel Offices & Partners

10 September 2026

Flexible IP Speaker Kits for Custom Speaker Solutions

Zenitel is pleased to introduce the ZIPS-K and ZIPS-KOE, two new IP speaker kits that give partners and integrators greater flexibility when developing customised IP speaker solutions.

Based on Zenitel's proven IP audio platform, the kits are intended for integration into customer-specific indoor and outdoor solutions using selected external components and enclosure designs. They combine high-quality IP audio with network-based management, monitoring and configuration, and are compatible with Zenitel Connect, ICX-AlphaCom, IC-EDGE and SIP environments.

With flexible I/O, relay functionality and support for external devices such as beacons, the ZIPS-K and ZIPS-KOE provide a simple way to integrate Zenitel IP audio functionality into a wide range of security and communication applications.

Key Highlights

The ZIPS-K and ZIPS-KOE kits brings core Zenitel IP audio and integration capabilities into a flexible kit format:

- Designed for integration into custom indoor and outdoor IP audio solutions
- Compatible with Zenitel Connect, ICX-AlphaCom, IC-EDGE and SIP
- Wide support for IP networking standards and VoIP protocols
- Flexible hardware interfaces, including GPIO, relay and mic/line input
- Support for connection of external beacons and auxiliary devices
- Remote software upgrade, configuration and monitoring via Zenitel Cloud RMM
- Power over Ethernet (PoE) support
