RAK-DUCT-01

PAVA **Cooling Duct** for the V2000

The RAK-DUCT-01 is a 1U rack-mount air duct designed specifically to complement the RAK-FAN-01, ensuring optimal cooling for stacks of V2000 amplifier frames installed in a single cabinet. Positioned between the V2000 units, the duct effectively channels airflow upward through the cooling slots of the V2000 chassis, facilitating efficient heat dissipation. For more information on system design and effective heat management strategies, please refer to the Zenitel System Design Guide.
